

# he Mission

on 17 will host a world-renowned science, art, and technology collaborative that will answer community questions while honoring Lowell Observatory's mission. Through strategic partnerships, the site will host and attract world-class scientific research and support scientific endeavors tied together in a natural setting that fosters life-long learning. Making Flagstaff the go-to place for STEAM, the section's resources will be a destination for knowledge seekers in a sustainable, high-impact environment that becomes a model for others to follow.

## Honoring the Natural Setting

Rooted in the commitment to maintain the ease of access to nature, protect sensitive environmental assets, and support broader environmental goals.

## Creating a Destination for STEAM

An arts and sciences haven for Flagstaff residents and for innovators and collaborators from around Arizona, the USA, and the world.

## Placing a Focus on Community

A series of unique and inviting spaces welcomes the community and visitors to utilize the site.

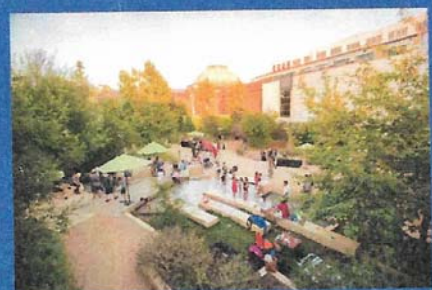

### Dark Skies

The star-filled night sky is important for astronomy and research, and the grandeur of the night sky will be accessible to everyone and is a deeply held Flagstaff value.

### Nexus for Research

With a research park supporting world-class astronomy, planetary science, and other disciplines, Section 17 will become a renowned center of discovery.

### Vibrant Open Space

Publicly accessible open spaces and elegant trails will foster a sense of community and provide opportunities for interaction and exchange.

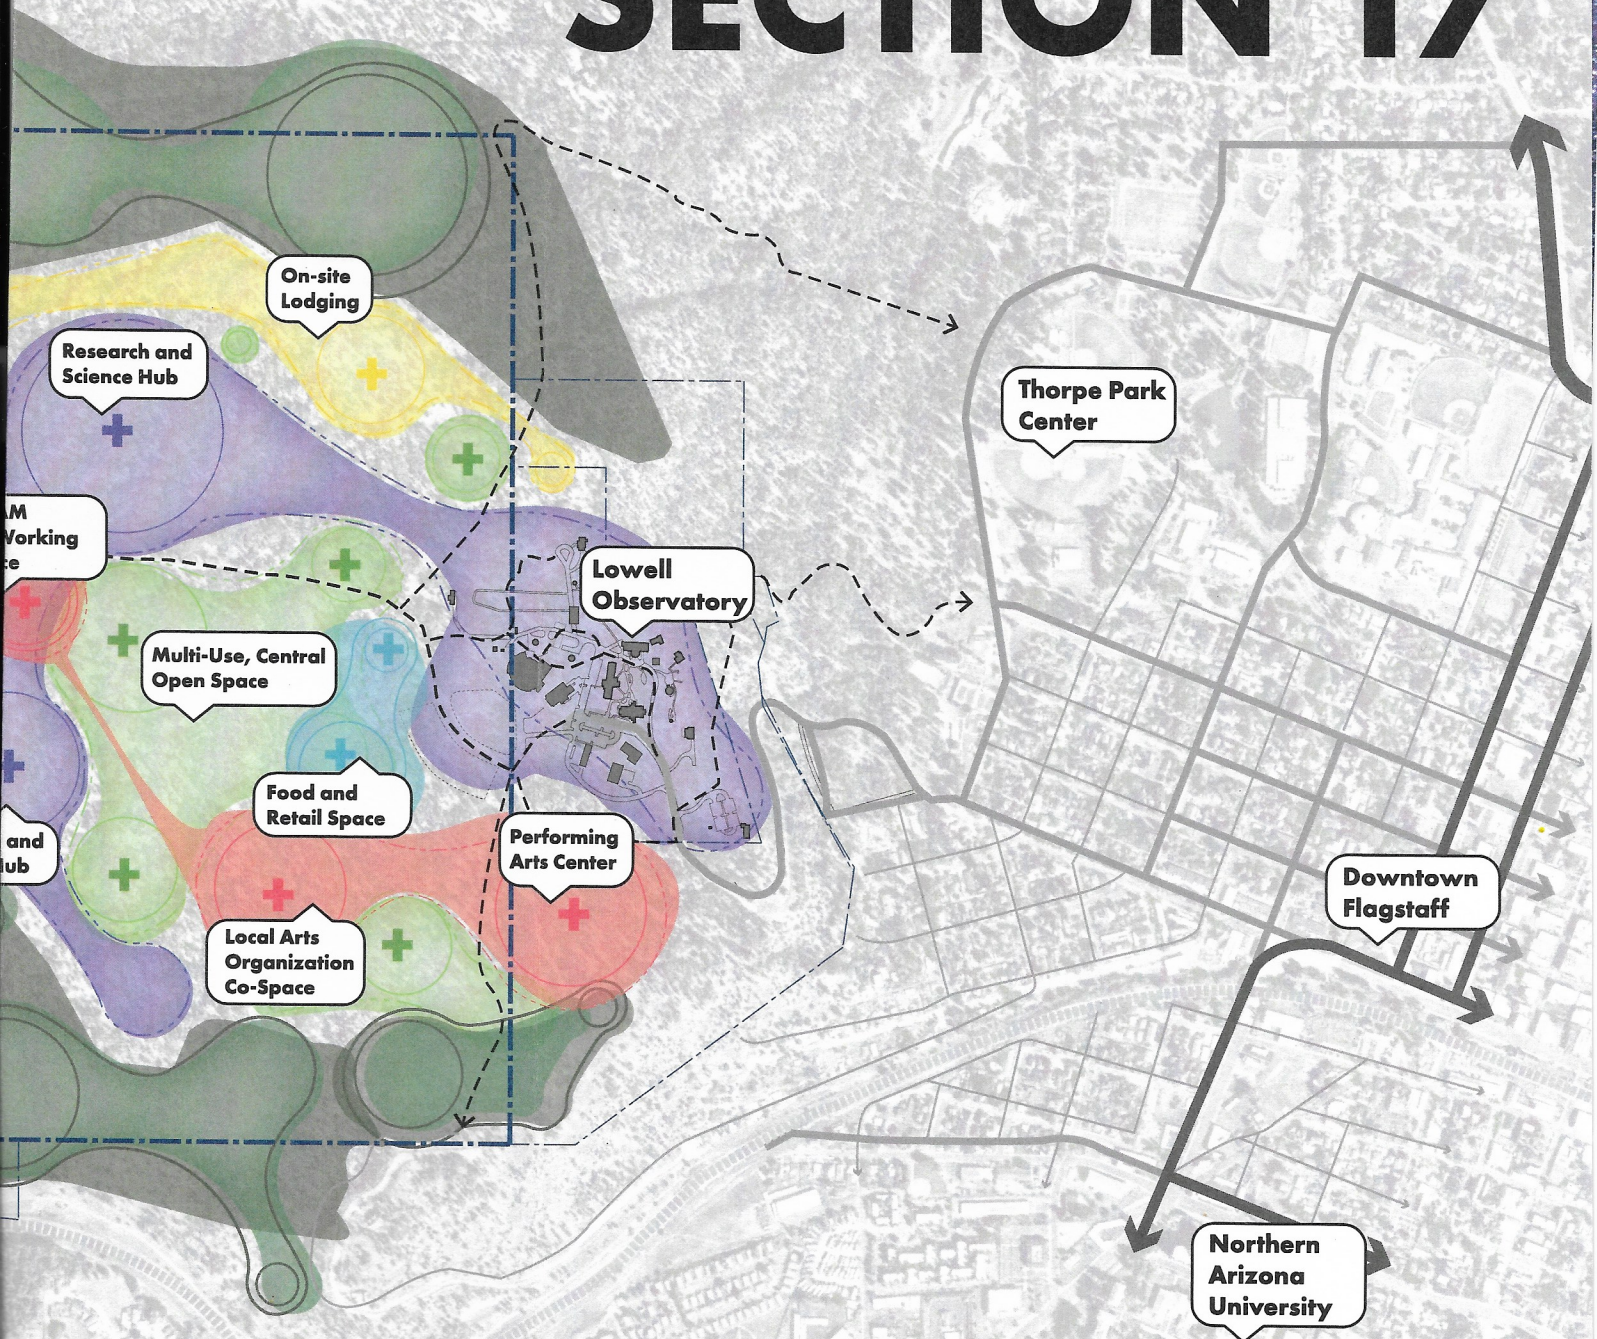

### Forest Conservation

Retentive combination of lands and the ecosystem.

# SECTION 17

## CONSERVATION

...es and forest,  
...native  
...ed and enhance  
...y of the site.

## LIFE-LONG LEARNING

Space for learning and public enjoyment will await youth, adults, visitors – and anyone with a curious mind.

## PHYSICAL CHARACTER

The character of the site will be expressed through natural materials, view opportunities, and integration into the forested setting.

## INTEGRATION OF THE ARTS

A deep connection to Flagstaff's thriving arts community will provide a vital complement to the science and technology on the site.

Attached are a left and right side scanned images of the “map” portion of a brochure we have printed and shared within the Flagstaff area regarding our work. This represents the conceptual phase of proposed development. We have not gone any further as we are in a bit of a “chicken and egg” situation without passage of the bill. The color shaded areas are meant to show conceptual and approximate relative sizing for the different areas of use. They are **\*not\*** meant to show actual locations.

I can arrange to send hardcopies if you want, please provide mailing or shipping instructions.

Since the brochure was printed the committee makeup has changed slightly, mostly through additions. The current committee consists of the following individuals:

Nat White, Chair, retired astronomer and member of Coconino Community College Board

Allan Affeldt, La Posada Hotel

Art Babbott, Coconino County Supervisor, District 1

Rich Bowen, Genterra Enterprises

Leo Crowley, retired attorney specializing in land use

Randon Cupp, Foothills Bank

Brigid Dineen, Past Director, Flagstaff STEM City

David Engelthaler, TGen North

Andy Francis, Flagstaff Mesa Homeowners’ Association

Brad Garner, The Arboretum at Flagstaff

Joanne Keene, Chief of Staff, Northern Arizona University

Tim Kinney, Genterra Enterprises

Joe Llama, Astronomer, Lowell Observatory

Marj McClanahan, Nordstrom & Associates

Mike Penca, Superintendent, Flagstaff Unified School District

Lisa Prato, Astronomer, Lowell Observatory

Jim Reed, retired

Dave Schleicher, Astronomer, Lowell Observatory

Jonathan Stone, Executive Director, Flagstaff Arts Council

Aaron Tabor, Flagstaff STEM City, Coconino Community College

Dawn Tucker, Flagstaff Shakespeare Festival

Dave Wessel, Flagstaff Metropolitan Planning Organization

Duffie Westheimer, Flagstaff Historical Land Trust
